Water and Wastewater Treatment Systems

VEW (Vehicle Washwater System)

ACS Medio Ambiente

ACS Environmental's VEW Series Vehicle Equipment Wash water treatment systems are self-contained, packaged treatment systems designed for efficient removal of oils, fuels, hydraulic fluids, filterable solids, readily settleable solids, sheens and many other contaminants.

The VEW's fiberglass construction, compact footprint and low profile design requires less space and installation labor than competitive designs.

Our designs incorporate best available, industrial grade technologies and not consumer grade "pool or spa filter systems".

Due to a wide variety of applications ACS offers many system configurations to meet your requirements.

We review each application and provide a solution custom tailored to meet the project requirements, customer desires and budget constraints.

DIMENSIONS and CAPACITIES												
Model	Dimensions (inches)			Fitting Sizes (inches)				Weight (Lbs.)		Media Ft2	Sludge Gal.	Flow GPM
	A	B	C	INLET	OUT	OIL	SLUDGE	Empty	Operating			
VEW-2	7'	2'-0"	5'-6"	2	2	2	2	550	1425	486	6.5	5
VEW-4	7'-7"	2'-3"	6'-3"	2	2	2	2	650	2280	972	13	10
VEW-8	8'-6"	2'-6"	6'-10"	2	2	2	2	975	3600	1944	13	20
VEW-12	9'-0"	4'-0"	6'-10"	3	2	3	3	1500	5800	1866	25	30
VEW-16	9'-5"	5'-6"	6'-10"	3	2	3	3	2000	8700	2488	37	40

*Information not for construction *Design & dimensions may change without notice *Flow rates are nominal

Advantages of the VEW

- OS Series oil/water separator
- Adjustable oil skimmer
- Solids filter Solids settling
- Effluent pumpout
- Flow meter
- Coalescing media
- Nema 4 controls
- Small footprint
- Steel system skid
- Lightweight, compact design

Applications

- Vehicle wash rack: car/truck/aircraft/bus
- Groundwater remediation
- Refueling depot runoff
- Machining coolant oil removal
- Vehicle washwater treatment
- Oil spill recovery
- Bilge/ballast water treatment
- Coolant treatment
- Equipment maintenance facilities
